1. Personal data

Name: Economou Nikos
Address: Applied Geophysics Lab, School of Mineral Resources Engineering, Polytechnioupolis 73100, Kounoupidiana, Chania, Crete, Greece.
Telephone: 0030-2821037677
Fax: 0030-2821006901
Date of birth: 10th July 1971
Place of birth: Thessaloniki, Greece.
Nationality: Greek
Army duties fulfilled: 1997-1998 Greek Navy
Family status: Married with two kids

2. Education

- 1998 B. Sc. Mineral Resources Engineering Department (MRED) Technical University of Crete (TUC), Greece. Title: “Geophysical research at the archaeological site of Itanos, Lasithi, Crete, Greece”.
- 2002 M.Sc., MRED, TUC, Greece. Title: “Presentation and interpretation of geophysical data using GIS”
- 2010 Doctor of Philosophy (Ph.D) in Applied Geophysics, MRED, TUC, Greece. Title: “Development of GPR data processing methods using S-transform”.

3. Honors

- 1999 Scholarship - Technical University of Crete, Greece, for M. Sc.
- 2013-2017 Leader (with Prof. F. Benedetto from University of Roma) of the project “Development of advanced GPR data processing techniques”, TUD COST Action TU1208.

4. Scientific community services

4A. Editorial work

2015-2016: Chief-guest-Editor, Special Issue in the journal “Signal Processing” by Elsevier, “Advanced Ground Penetrating Radar Signal Processing Techniques”.

2011-today: I have reviewed articles for the following scientific journals
Geophysics, Signal Processing, Journal of Applied Geophysics, Nondestructive Testing and Evaluation International, Journal of Balkan Geophysical Society, and Journal of Geophysics and Engineering.

4B. Conferences

2013 – Organizing committee of the 13th International Conference of the Greek Geological Society.

2014 – Chair for the GPR and Electromagnetics session at the 20th Near Surface Geosciences Conference.

2015 – Organizing committee of the 8th Conference of Balkan Geophysical Society.

5. Professional and scientific experience

5A. Academic experience

- 9/1998 to 1/2003: Researcher at the Applied Geophysics Lab. of the Mineral Resources Engineering Department, under six month's sequential contracts.
- 8/2001: Visiting researcher at the University of Bochum, Germany, for seismological data processing, Professor Hans-Peter Harjes.
- 2/2003 to 7/2014: At Technical University of Crete as "Specific Technical and Laboratory Personnel" (STLP) for the Applied Geophysics Lab.
- 9/2013 to 12/2014: External advisor for Arab Center for Engineering Studies (ACES), Jeddah, Saudi Arabia.
- 8/2014 until today: At Technical University of Crete as "Teaching and Laboratory Personnel" (TLP) in Geophysics.

5B. On – going R&D activities

PI: Principal Investigator (coordinator)

1. Geophysical survey at the ancient city of Itanos, Lasithi, Crete, Greece (1995-2001). Funded by the French Archaeological School of Athens. PI: A.Vafidis.
2. Passive and active seismics in Western and Central Crete, Greece (1996 – 2006). Funded by the German Science Foundation. PI: H-P Harjes.
3. Geophysical survey for antiquities at Alexandria, Egypt (6/2000). Resistivity mapping, sounding and tomography at the Old Jewish Cemetery of Alexandria, Egypt. Funded by the Foundation of Research and Technology, Greece (6/2000). PI: A. Sarris.
4. Geophysical survey for hydrogeological purposes at Kalimnos island (2001). Funded by the Kalimnos Municipality. PI: G. Tsokas.
5. Geological and geophysical survey of Vasilies village (2001-2002). Funded by Heraklion Municipality PI: D. Monopolis.
6. Artificial lakes in West Crete: Geophysical survey at Kountoura. Funded by the Pelekanos Municipality (2003-2004). PI: A. Vafidis.
7. Hybrid Geophysical technology for the Evaluation of Insidious contaminated Areas (HYGEIA) (2001-2005). Funded by the European Union. PI: A. Vafidis.
8. Monitoring of soil and groundwater pollution from petroleum products using modern geophysical methods (2004–2006). Funded by the General Secretariat of Research and Development, Greece. PI: A. Vafidis.
9. Groundwater management and protection from saline water intrusion (2004 – 2005). Funded by the General Secretariat of Research and Development, Greece. PI: A. Vafidis.
10. Hybrid geophysical survey for imaging the saline water front at Stilos, Chania Prefecture, Greece (2005-2006). Funded by the Ministry of Education. PI: A. Vafidis.
11. "Geophysical survey on the E65 national road, Greece". Applied Geophysics Lab and ISTRIA Ltd. (7/3/2006-6/4/2006). PI: A. Vafidis.
12. Geophysical survey on Ionian national road, Greece". Applied Geophysics Lab and ISTRIA Ltd. (2/7/2007-31/8/2007). PI: A. Vafidis.
13. "Geophysical survey on the E55 national road Greece". Applied Geophysics Lab and ISTRIA Ltd. (19/5/2008-18/12/2008). PI: A. Vafidis.
14. "Geophysical survey at coastal areas on Crete and nearby small islands",. LIFE+ Nature project "Actions for the conservation of coastal dunes with

- Juniperus spp. in Crete and the South Aegean (Greece)”, known as JUNICOAST, LIFE07NAT/GR/000296. Applied Geophysics Lab. Is a subcontractor of MAICH (1/5/2009-30/6/2010). PI: A. Vafidis.
15. Geophysical survey at the Loutsia Remeri quarry”. Applied Geophysics Lab. and Titan AE (25/1/2010-24/4/2010). PI: A. Vafidis
 16. “Geophysical survey at the Kelefina dum, Sparti, Greece”, Applied Geophysics Lab and ISTRIA Ltd. (1/9/2010-30/12/2010). PI: A. Vafidis.
 17. “Geophysical survey at Mallia, Crete, Greece”, Applied Geophysics Lab and ISTRIA Ltd. (1/7/2011-30/10/2011). PI: A. Vafidis.
 18. “Geotechnical evaluation of carbonates at the Electrical Company of Greece mines”, Geomechanics Lab and Applied Geophysics Lab of TUC (7/2012-3/2013). PI: Z. Agioutantis.
 19. “geophysiCaL basEd hydrogeologicAL modeling to pRevent pollution from sea WATER intrusion at coastal areas- CLEARWATER”, BLACK SEA ERA.NET. Technical University of Crete, Chania, Ankara University, Ankara and Greifswald University, Greifswald (1/2/2012-30/1/2015). PI: A. Vafidis.
 20. THALIS, Hellenic Republic, Ministry of Education and Religious Affairs, funded by ESPA. Acronym: GEOCHARACTERIZATION. Cooperation of TUC, NTUA, ITSAK, TEI-Crete and IMS-FORTH (1/2/2012 – 30/9/2015). PI: A. Vafidis.
 21. “Geophysical investigation using electrical tomography at the Loutsia-Remeri quarry”. Funded by TITAN cements ltd. Applied Geophysics Lab. (7/2012-10/2012). PI: A. Vafidis.
 22. “Additional works for the delineation of the Omalos polje dam, including the environmental effects estimation due to its construction”. Municipality of Innachorion and Technical University of Crete. PI: A. Vafidis (7/2012-10/2012).
 23. TUD COST Action TU1208 Civil Engineering Applications of Ground Penetrating Radar (4/4/2013-3/4/2017). This action consists of several working groups (WG) and “Projects”. I am the co-leader (with Prof. F. Benedetto from University of Roma) of the project “Development of advanced GPR data processing techniques”. PI: L. Pajewski.
 24. ISTRIA. Development of an integrated rock fall monitoring and prediction system. Synergasia 2011-Greek National Organization of Research and Technology. (5/2012-5/2015). PI: G. Exadaktylos.
 25. BEWEXMIN-Bucket wheel excavators operating under difficult mining conditions including unmineable inclusions and geological structures with excessive mining resistance. RFCR-CT-2015-00003 (1/09/2015- 31/08/2018). EUROPEAN COMMISION. PI: G. Galetakis.

** Participation in the projects above mainly includes partial involvement in initial proposal, geophysical measurements and preparation of the corresponding technical reports or deliverables*

6. Teaching experience

- Support of:
5 MSc thesis, >10 Graduate thesis.
- Tutor: Teaching of exercises for the courses related to 1) seismics (1998-2008 and 2014-today), 2) near surface geophysical methods (1998-today) and 3) loggings (1998-2013). “Applied Geophysics I” (shallow and deep seismics – head and reflected seismic waves), “Applied Geophysics II” (near surface geophysics) and “Geological Formations Evaluation using Loggings”; courses under Dr. A. Vafidis. School of Mineral Resources Engineering. Technical University of Crete.
- Tutor: Teaching of exercises for courses related to the Geology of Greece, under Dr. E. Manoutsoglou (from October 2013 until today). “Geology”, School of Mineral Resources Engineering.
- Tutor: Teaching of exercises for courses related to the Geology of Greece, under Dr. E. Manoutsoglou (from October 2013 until today). “Environmental Geology” School of Environmental Engineering. Technical University of Crete.
- Tutor: Teaching of exercises for the graduate courses “Seismic Imaging and well logging” related to Petroleum Engineering (PetEng), MSc program (2014-2015), courses under Dr. A. Vafidis. School of Mineral Resources Engineering. Technical University of Crete.
- I am also teaching MatLab non-regular seminars related to data processing at a graduate level since 2013. These are introductory seminars for geophysical signal processing.
- Participation in all field works related to students exercises every year from 1998 until today. Field works mainly included integrated geophysical surveys for the detection of buried antiquities, mapping of saltwater intrusion at coastal areas and detection of dolines, caves, fractures and weak zones in karstic limestones. These field works are implemented once a year under the frame of the lesson “Field work IV” of the School of Mineral Resources Engineering.

7. Academic work

7A. Thesis

1. “Geophysical research at the archaeological site of Itanos, Lasithi, Crete, Greece”, **Diploma thesis**, Mineral Resources Engineering, Technical University of Crete, Greece, Chania 1998. Supervisor: A. Vafidis.

This thesis includes the results of an integrated geophysical research conducted at the archaeological site of Itanos, Lasithi, Crete, Greece, during 1995-2001, in order to detect buried antiquities. The methods employed were electrical resistivity mapping, electrical tomography, magnetics, GPR, electromagnetic mapping and seismic refraction. Processing for all the methods mentioned above was applied during the development of this thesis and the final results were presented to an open audience.
2. “Presentation and interpretation of geophysical data using GIS”, **MSc thesis** in the Environmental Geotechnology Post-Graduate Program, Department of Mineral Resources Engineering, Technical University of Crete, Greece, Chania 2002. Supervisor: A. Vafidis.

This thesis is related to the development of a GIS project (based on the ArcView GIS) dedicated to the presentation and integrated interpretation of different geophysical methods. A dedicated user interface was created, using the programming language “Avenue”, which permitted the user to view and interpret different geophysical, topographic and geological data. It’s use and capability for relevant applications were presented to an open audience.

3. “Development of GPR data processing methods using S-transform”, **PhD thesis** in the Environmental Geotechnology Post-Graduate Program, Department of Mineral Resources Engineering, Technical University of Crete, Greece, Chania 2010. Supervisor: A. Vafidis.

In this PhD thesis, a methodology for efficient time-variant deconvolution for EM waves (GPR data) is proposed, which is mainly implemented in the t-f domain, using S-transform. In order to correct for attenuation effects, a spectral balancing technique, using the S-transform, is proposed. Furthermore, it is demonstrated that spectral balancing must be applied prior deconvolution, rather than being an alternative technique. After wavelet deconvolution a further correction of the residual phases is taking place using the maximization of kurtosis method. The technique’s efficiency is demonstrated first on synthetic data. Then, it is applied on a dataset acquired over a controlled experiment for buried in sand utilities detection and reflections from the water table and a capillary zone above it are revealed. The proposed methodology was also tested on a dataset acquired in the Bissen quarry, in Wisconsin, USA and its ability to delineate reflections buried in noise and wavelet ringing is demonstrated. Finally the proposed methodology is applied on a dataset from an area where buried metallic tanks existed proving its efficiency in increasing the temporal resolution. The processing method’s steps and efficiency were presented to an open audience.

art and open issues”, First Meeting of the COST ACTION TU1208, Rome, Italy. Proceedings, <http://gpradar.eu/resources/books.html>, ISBN978-88-548-7221-9. [Invited chapter for the Springer Book entitled *CIVIL ENGINEERING APPLICATIONS OF GROUND PENETRATING RADAR*].

- 45) **Economou N.** and F. Benedetto, 2014, Development of advanced GPR data processing techniques, Vienna, 2nd meeting of the TU1208 Cost Action, EGU 2014. Proceedings, <http://gpradar.eu/resources/books.html>, ISBN 978-88-548-7224-0.

7DC. Invited presentations without articles (2)

- 46) **Economou* N.**, and F. Benedetto, 2015, State of the art on Advanced data processing algorithms for GPR, Athens, 4th meeting of the TU1208 Cost Action.
- 47) **Economou* N.**, 2015, Conventional data processing steps to be included in guidelines for GPR assessment of flexible pavements & for GPR detection and location of utilities and voids, Athens, 4th meeting of the TU1208 Cost Action.

7DD. Presentations at conferences (abstracts) (3)

- 48) Sarris, A., Vafidis, A., **Economou**, N., Poulidou, G., Limneou-Papakosta, C., (2001), “Prospecting the old Jewish Cemetery in the center of Alexandria, Egypt”, 4th Int. Conf. On Archaeological Prospection, Austrian Academy of Sciences, Vienna, September 19-23.
- 49) **Economou*, N.**, and Vafidis, A., 2002, Geophysical data presentation using GIS, an example from the archaeological site of Itanos, Crete, Greece, 11th meeting of Greek GIS users, ArcInfo-ArcView, Marathon Data Systems, Athens, November 2001.
- 50) **Economou*** N., Vafidis A., Hamdan H., Kritikakis G., Andronikidis N., and Dimitriadis K., 2011, Time varying deconvolution of GPR data in civil engineering, Conference of European Geosciences Union, General Assembly 2011, Session GI-6 Civil Engineering Applications of Ground Penetrating Radar, Vienna, Austria, 3-8 April [invited paper by “*Nondestructive Testing and Evaluation*” for the Special Issue on “*Civil Engineering Applications of Ground Penetrating Radar*”].

7E. Participation in the development of students notes

- 1) Courses of “Applied Geophysics II” (near surface geophysics courses including the electrical, magnetic, gravimetric and electromagnetic methods). Professor A. Vafidis.
- 2) Courses of “Formation Evaluation using Loggings” (courses related to the interpretation of loggings). Professor A. Vafidis.
