Golden Paragraph

Associate Professor in the areas of GIS, Space informatics, EO and UAVs in the Technical University of Crete. PhD in Spatial Information Science & Engineering from the University of Maine, part of the National Center for Geographic Information and Analysis (NCGIA) in USA and in a NASA sponsored center of excellence Remote Sensing Laboratory. He has numerous publications and research projects as a coordinator, and serves as an invited speaker on research and innovation. He directs the Space Informatics Research Team (SenseLab) comprising of more than 30 multi-disciplinary members which managed to become a world leading Research Group. Many prestigious international awards and distinctions during highly competitive contests. UAVs for Prof. Partsinevelos do not constitute a simple application area but his team disrupts this research field by fully autonomous, collaborative, real - time, AI enabled, on board platforms way before these are implemented globally.
